Executive Summary

The Trade Remedies Authority (TRA) is conducting an anti-dumping investigation to determine whether injury is being caused to the UK excavator industry due to dumping of Certain Excavators imported into the United Kingdom (UK) from China.

More information about the case can be found on the public files:

[AD0047 – Certain excavators from the PRC](#)

SANY Heavy Machinery (UK) Ltd (SANY UK), a domestic importer of the goods concerned, returned a completed, domestic importer questionnaire ('questionnaire response'). SANY UK imports the goods concerned produced by SANY Heavy Machinery Limited (SANY Kunshan) and Shanghai SANY Heavy Machinery Co., Ltd. (Sany Shanghai) in the PRC. SANY UK does not import the goods concerned from any non-associated companies. The TRA sought to verify the completeness, relevance and accuracy of the information submitted.

- We conducted a walkthrough of the accounting systems to assess how much reliance we can place on information produced by the system.
- We compared questionnaire responses and other accompanying evidence and information to open sources such as Companies House, SANY UK's websites, etc. checking for consistency.
- We checked information and data provided for consistency with financial statements and responses from other interested parties.
- We conducted an online verification visit where SANY UK explained its calculations and the reasons behind them. It showed how the figures in its questionnaire annex reconcile with its figures from its supporting documents and accounting system.

Based on the verification activity undertaken the TRA has a reasonable level of assurance on the completeness, relevance and accuracy of the information provided by SANY UK and we can use it for the purpose of this investigation.

Purpose of verification

The purpose of the TRA's verification activity is to determine whether the information provided by interested parties is complete, relevant, and accurate and can be used in our investigation. This verification report sets out the conclusions reached for each component that covers the scope of our work. It also provides an overall conclusion stating the level of assurance reached.

The information verified may then be considered in our assessments and analysis to determine whether dumping has occurred and if this dumping is causing injury to the UK industry. This will form the basis for establishing appropriate measures where necessary, and to assess whether these are in the UK's economic interest.

We carried out verification activities remotely. The TRA did not seek to verify all information provided, but undertook the work considered appropriate and possible within the time constraints of the investigation to obtain assurance upon which to base our case decision.

This verification report documents the work completed, providing an overview of the range and scope of verification procedures performed, for each component that covers the scope of our work, on the information submitted by SANY UK. It details the conclusions reached regarding completeness, relevance, accuracy and provides an overall conclusion stating the level of assurance reached.

It must provide reasons as to why the particular information is considered confidential (see also [public guidance](#)).
