The New JCB 370X Tracked Excavator

EXTREME STRENGTH

If you need the largest JCB X Series excavator, you'll need it to be strong enough to meet the demands of your site. That's why the 370X has undergone extensive testing for ultimate robustness.

- All-new dig end with reinforced structures for maximum durability.
- Bucket pin diameters maximised to 100mm to add extra strength.
- Updated slew ring.

- Anti-slip tread plates, ergonomic grab handles and side-guard rails for safer access to the upper structure.
- 10-minute Follow Me Home lighting to extend visibility during late hours.

EXCEEDINGLY COMFORTABLE AND EASY

The 370X isn't just designed with performance in mind – we've put the operator first to make it even more comfortable and easy to work with. The best-in-class cabin has a host of new features.

- Sleek and intuitive 10" touch screen display with integrated HD camera feed.
- Customisable user profiles with immobilizer input code for greater security.
- Increased intervals for hydraulics, induction filters and greasing to simplify servicing.
- Ground level access for most daily checks.

An investment in this JCB tracked excavator adds up to reduced ownership costs. Fuel-saving features and extended service intervals mean you'll pay less to keep your machine running for many years to come.

- Engine Auto Stop and Idle features help your fuel go further.
- Filter changes reduced by 23% over the 370X's 10,000 hour lifetime.
- High quality components and easy access to maintenance save significant costs and time.

DISCOVER JCB UX ON THE 370X

We're thrilled to announce that the first machine to incorporate JCB UX excavator software is our all-new JCB 370X.

JCB UX combines innovation and simplicity to produce a seamless operator experience across the fleet of JCB machines. With customisable, user-friendly features and integrated support, this machinery software operates seamlessly with your machine to optimise performance with minimal effort.

TOWN OR POSTCODE

Discover the JCB X Series

Featuring our CommandPlus cab, the JCB X Series is stronger, more durable, more productive, and more comfortable than any JCB tracked excavators before.

10 Things you need to know about the JCB X Series

Our vision from the start was to design and engineer our most advanced tracked excavator range ever. The new JCB 13-15 tonne machines sit perfectly alongside their new highly acclaimed 20 tonne big brother.

Building a greener future: Hydrogen

Innovation. That's what JCB has been delivering for over 75 years. Now we're working on hydrogen combustion engines, so that our agricultural and construction machinery can be net zero on carbon emissions.

Road to Zero

It was always our intention to build our own diesel engines and that dream became a reality in 2004. From then on, it was all about continuous improvement and making our engines as fuel-efficient as possible, while reducing harmful emissions.

JCB Services

JCB maintenance services to help you run efficiently, reduce costs, and minimise any downtime – so you can keep doing what you do best.

Related Models

A tracked excavator that's tailor-made for the rental industry, the 131X offers an unbeatable mixture of durability and unparalleled ease of maintenance.
