## Biodiesel Industry's Role in the Palm Oil Mix

U.R. Unnithan, Deputy President, Malaysian Biodiesel Association (MBA)  
Reach & Remind Friends of the Industry Seminar 2015 & Dialogue  
February 12, 2015

## Presentation Outline

1. Global Crude Petroleum Scenario
2. Malaysian Crude Petroleum Scenario
3. Global Oils & Fats vis a vis Crude Petroleum
4. Palm Oil vis a vis Other Oils & Fats
5. Malaysia and Indonesia's Position in Oils & Fats Export Trade
6. Palm Oil Supply/Demand Scenario till 2025
7. Biodiesel's Role In Oils & Fats Demand till 2025
8. Global Biodiesel Scenario
9. Current Status of Malaysian Biodiesel Mandates
10. Indonesia's Biodiesel Implementation Plan
11. Direction for Malaysia's Biodiesel Implementation

2

## Direction for Malaysia's Biodiesel Implementation

- At USD45/bbl for Brent Crude or USD460/MT for Gasoil, there is absolutely no export market for Malaysian Biodiesel.
- Extend B7 usage to all sectors as a National Mandate at the same formula pricing as it is today (RBDPO + RM515/MT).
- Implement B10 immediately across all sectors to arrest slide in CPO price come end of Q1 2015 when CPO production picks up. This would be equivalent to 1 million MT per year of biodiesel (37% capacity utilization out of 2.7 million MT installed capacity)
- Implement B20 by 2016 in line with Indonesian target. This is equivalent to 2 million MT per year of biodiesel (74% capacity utilization out of 2.7 million MT installed capacity).
