**Decisions on Not Responding to Questionnaires in
Transition Review No.TD0035 & No.TS0036
Transitional Anti-dumping Review and Transitional Anti-subsidy Review on Certain
Pneumatic Tyres Used for Buses and Lorries Originating in the People's Republic of China**

To dear whom may concern in Trade Remedies Authority,

I am [redacted-personal information] from Wei Fang Goldshield Tire Co., Ltd. ("We"). We are one of the sampled Chinese exporters in the investigation against certain pneumatic tyres used for buses and lorries originating in the People's Republic of China (Case Number: "No.TD0035" AND "No.TS0036").

Since we only had very limited volume of buses and lorries tyres exported to the UK during the POI, after careful considerations, we decide not to respond to the anti-dumping and anti-subsidy Exporter Questionnaires. Instead, we will provide cooperations via participating in the injury defence organised by China Rubber Industry Association on behalf of Chinese exporters.

In any way, we still would like to offer our assistance to smooth the investigation. If you have any further request or need any assistance, please do not hesitate to let us know and we will do our best to cooperate sincerely.
