September 14, 2020, [AEX.RU](#) - Overhaul of the runway (runway) of the airport of the northernmost city of Russia - Peveka in Chukotka was postponed to 2021. Due to the closure of borders during the pandemic, the contractor was unable to bring the necessary number of foreign specialists to Russia. This is reported by [TASS](#) with reference to the data of the district government.

"The repair of the airport runway was planned to begin in May this year. But due to the epidemiological situation and the closure of borders, the contractor, the Serbian company Planum, could not bring the necessary number of specialists. In this regard, it was decided to postpone the overhaul of the strip to next year," the government said.

It is planned to replace the concrete pavement of the runway with an area of 2.5 thousand m in two years. The whole range of works is planned to be completed by 2023, the contract price is 3.6 billion rubles.

Russian President Vladimir Putin previously instructed to solve issues of increasing transport accessibility and development of small aircraft, including airports in the Far East. At the initiative of the head of state, a section on advanced development of the Far East has been included in the state program "Development of the transport system", which includes the reconstruction of 40 airports, including the airport in Pevek.
