## Completing this registration form and pre-sampling questionnaire

To register to this case, you need to provide two copies of your response to this form: a confidential and a non-confidential version. Your non-confidential version should be as similar as possible to your confidential version except for the redaction of the confidential information.

Both copies must be returned to the TRA by **20 March 2026** using the Trade Remedies Service ([www.trade-remedies.service.gov.uk](http://www.trade-remedies.service.gov.uk)).

The non-confidential version of your registration form and pre-sampling questionnaire may be placed on the public file: <https://www.trade-remedies.service.gov.uk/public/cases/>.

It is your responsibility to ensure that the non-confidential version does not contain any confidential information, which includes personal contact information, names and signatures. Please see the [TRA's public guidance](#)<sup>1</sup> for further information on providing confidential information and non-confidential summaries.

<sup>1</sup> <https://www.gov.uk/government/publications/the-uk-trade-remedies-investigations-process/the-tras-investigation-process>

All information provided to the TRA in confidence will be treated as confidential in accordance with regulation 45 of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019 (the Regulations) and will not be disclosed (except in limited circumstance as permitted by regulation 46 of the Regulations) and will be stored in protected systems.

## Request to complete a detailed questionnaire

If, on the basis of the information provided in this form, we determine that you are an overseas exporter or an importer of the goods subject to the investigation, or a UK producer of goods that are like the goods subject to the investigation, or a contributor, we will ask you to complete a detailed questionnaire to inform this investigation.

If we consider it appropriate, we may only ask a sample of overseas exporters, importers and/or UK producers to complete a detailed questionnaire. By submitting this completed registration form and pre-sampling questionnaire, you agree that you may be included in any such sample.

If your company is included in the sample, you will be asked to respond to the questions in the detailed questionnaire and to support the TRA in verifying your responses. This may involve the TRA carrying out a verification visit to your premises.

If you are an overseas exporter and indicate that you do not agree to possible inclusion in a sample, your company may be deemed not to have cooperated in the investigation. The TRA will base its findings for non-cooperating parties on facts available. This may result in an outcome that is less favourable to your company than if it had cooperated.

If we decide to sample overseas exporters, and your company is not selected for this sample, you may submit a request to us to calculate individual margins for your company. We will accept your request providing that:

- you submit the required information on time; and
- the number of exporters subject to examination is not so large that complying with the request would be unduly burdensome and risk preventing the timely completion of the investigation.

9. Were there significant fluctuations in major input costs (such as raw materials or energy) across the POI, which had a material impact on the overall cost to make of the goods? If yes, please provide details of these fluctuations.

We have set out below the factors which impact the overall cost to make the goods, there were significant fluctuations across each of these factors during the POI, further information in respect of which will be provided as part of our substantial response:

- Energy expenses are among our primary cost drivers, and as energy prices—both natural gas and electricity—are difficult to predict, we therefore experience unforeseen cost fluctuations.
- Approximately 80% of our raw material costs are exposed to foreign exchange rates; consequently, exchange rate volatility directly impacts our cost structure.
- Our main raw material input, silica sand, is imported. In the event of supply disruptions, we may need to switch countries that we supply from or suppliers, which can lead to significant cost increases—even in the original currency.
- Additionally, a large portion of the raw materials we procure locally in Türkiye are still priced based on global rates, which further exposes us to international market fluctuation.
- High inflation, coupled with the increasing share of labour costs, also has a direct impact on our cost structure.

10. Is your company, or any of your associated parties, related to any company in the UK, particularly any of the UK producers and/or importers of the goods that are like the goods concerned (the UK like goods)?

29. If you consider that the goods description for the investigation should be varied, please specify the suggested changes and provide your reasons in the field below.

30. Please provide any further remarks relating to the goods concerned and the goods that are like the goods concerned (the UK like goods). Areas may include, for example: the interchangeability of different types and brands of glass containers.

### B3. Product control numbers

The TRA uses product control numbers (PCNs) to define and distinguish the different types or subcategories of goods that fall under the goods description of the goods concerned. Subcategories are developed on the basis of differences in the physical and/or commercial characteristics of the goods which may impact the price at which each subcategory is sold.

PCNs, which come in the form of an alphanumeric code, help to create a categorisation system so that comparisons can be made between goods produced in the UK and those produced in Türkiye.

We have created the following draft PCN table:

Category	Code	Description
Glass colour	P	Colourless (Premium / extra white flint)
	S	Colourless (Standard flint)
	C	Coloured Glass
Nominal capacity	A	0-24 ml
	B	25-49 ml
	C	50-74ml
	D	75-99 ml
	E	100-199ml
Weight	A	0-24 g
	B	25-49 g
	C	50-74 g
	D	75-99 g
	E	100-149 g
Includes external (post-consumer) cullet	A	Yes, up to 24%
	B	Yes, 25-49%
Food assured	F	Yes (assured safe for use in food products)
	N	No (not food assured)
Pharmaceutical assured	P	Yes (Assured for use as a volumetric container)
	N	No (Not assured as a volumetric container)
Pressure assured	P	Yes (assured safe for pressurised goods (e.g. carbonated beverages)
	N	No (not assured safe for pressurised goods)
Volumetric assured	V	Yes (Assured for use as a volumetric container)
	N	No (Not assured as a volumetric container)
Container Type	B	Bottle (narrower neck than body)
	J	Jar / Ramekin (wide neck)
	O	Other
Container Design	S	Standard / generic / non-branded
	N	Non-standard / bespoke / complex (e.g. shaped / embossed)
Post furnace decoration	A	Painted / sprayed / printed
	B	Labelled, sleeved
	C	Other / multiple
	N	Not decorated
Supplied with lid / closure	Y	Yes
	N	No

Some examples of products and their corresponding PCNs are below:

- An amber pharmaceutical bottle with a nominal capacity of 50ml, weighing 40g, with a standard design and not provided with decoration. This good would be food assured but not volumetrically assured, and not suitable for use with pressurised products. This good was manufactured using 20% external cullet and is supplied with a lid  
= **CCBA FNNV BSNY**
- A standard flint (clear) food jar with a nominal capacity of 250ml, weighing 202g with a standard generic design and provided with an adhesive label at the factory. This good is not assured for use with foods, pharmaceuticals or pressurised goods. It is not volumetric, was not manufactured using external cullet, and is not supplied with a lid  
= **SFGN NNNN BSNN**
- An amber beer bottle with a nominal capacity of 500ml, weighing 290g, with a bespoke moulded design, volumetric assurance, usable for pressurised food but not pharmaceuticals, with a direct printed label and a single colour spray coating. This good was produced using 15% external cullet and is supplied with a lid  
= **CIHA FNPV BNCY**

31. Please review the above draft PCN structure for this investigation and comment in the field below whether the PCN structure is adequate and appropriate to categorise the goods produced, exported and/or imported by your company.

The proposed PCN structure is suitable and reflects the key variations across the glass market.

32. Please provide details of any technical or physical characteristic not included in the PCN structure that may affect the price comparison between the goods concerned and the goods that are like the goods concerned (the UK like goods).

33. If you are an overseas exporter or importer of the goods concerned or a UK producer of the goods that are like the goods concerned (the UK like goods), comment on whether the proposed PCN structure adequately aligns with your goods range. In particular, we would welcome your comments on:

- the categorisation of product features;
- the list of products included in the “other” category and whether this prevents a fair comparison between PCNs;
- whether you produce, or are aware of, any specialised products that fall within the definition of the goods concerned or the goods that are like the goods concerned (the UK like goods) which have a sufficiently different price point to

make them unsuitable for comparison with the other sub-categories of the “goods concerned”; and

- do you export, produce or import any goods that could be categorised under more than one PCN? If so, please suggest any changes to the proposed PCN structure?

34. Please provide details of any manufacturing process differences which you think may influence the PCN structure and the price comparison between the goods concerned or the goods that are like the goods concerned (the UK like goods).

## B4. Comments on subsidies

35. If you have any information about any alleged subsidies in Türkiye that are affecting the production or sales of the goods concerned, please provide details in the box below.

We do not accept the claims made in the application regarding subsidisation and will address this further in our substantive response.

Consider redacting this information in your non-confidential version of this form, in accordance with our [guidance](#).

36. Is any of the research and development conducted in relation to the goods your company manufactures performed by other companies within the same corporate group? If so, please provide details.

The Respondent is currently conducting enquiries internally in respect of this matter and will provide details as part of its substantive response.

Consider redacting this information in your non-confidential version of this form, in accordance with our [guidance](#).

37. Please describe the process by which your company secures land for use in the manufacturing and sale of the goods concerned. Is access to any land used in the manufacturing and sale of your goods, gained, or transferred (with or without compensation) from other members of the wider corporate group? If so, please provide details.

The Respondent is currently conducting enquiries internally in respect of this matter and will provide details as part of its substantive response.

Consider redacting this information in your non-confidential version of this form, in accordance with our [guidance](#).

## B5. Other comments

- Our export sales to the United Kingdom are conducted under the Incoterm FCA (Free Carrier). Under this arrangement, our responsibility includes delivering the goods to the designated location agreed with the buyer, which typically corresponds to the port of export in Türkiye. We bear all costs and risks related to inland transportation up to this point.
- Upon delivery of the goods to the carrier nominated by the buyer at the agreed location, the risk transfers to the buyer, and any subsequent costs, including international freight, insurance, and further logistics, are borne by the buyer.
