

PRODUCTS & APPLICATIONS

WHAT WE DO

TiO₂ pigment is a white, inorganic pigment used to provide whiteness and brightness in a wide variety of applications including paints, inks, plastics, and paper.

We manufacture a range of both sulfate and chloride high-performance TiO₂ pigments for all major applications. Each of our pigments has distinct properties, and is designed to deliver performance benefits in specific applications.

Our **BILLIONS™** TiO₂ pigment brands are established worldwide.

CUSTOMER FOCUSED

We are focused on meeting our customers' current and future needs. Our product development program is based on our customers' requirements. Our customers value our innovative pigments and the technical support we can offer.

Please note: This table is intended as an indication of the most appropriate product but please seek advice for your particular application.

TABLE KEY

- Highly Recommended
- Recommended
- Sulfate
- Chloride
