### **AD0075 - Anti Dumping Questionnaire extension request**

Dear AD0075 team,

We are writing to request an extension to allow us extra time to complete the anti dumping questionnaire and back up data required. While we are working to the best of its ability to collect all the information necessary to complete the questionnaire we would be grateful if the TRA could extend the deadline until the 17<sup>th</sup> April 2026.

The reasons behind the request include, but are not limited to:

- The data requested requires input from various areas of the business, including finance, operations, sales and supply chain. Key contributors from each of these areas have taken holidays and/or been on overseas business trips which have overlapped making it difficult to provide a complete and accurate set of data in line with the initial deadlines. The extra time would therefore help to prevent a deficiency notice later as it would allow us to file a much more comprehensive and detailed set of data than we would otherwise.
- The data being requested is being compiled inhouse by a Team that has no experience of anti dumping or anti subsidy investigations so is taking longer than initially anticipated, despite our best efforts.
- The data being requested is very large and complex and not in the format of our standard in house reporting / data capture processes, therefore data has to be pulled in via ADHOC reports which is taking longer than expected.

We are fully committed to meeting the deadline requested above and have no desire to hold up the TRA's investigation and believe the 17<sup>th</sup> April is only a few days after the current extensions other parties have requested and been granted. The additional time will allow us to provide a much more accurate and detailed response to the enquiry which should limit any deficiencies.

Thank you for your consideration

Yours faithfully,

Snorkel Europe Ltd
