**Anti-Dumping Investigation - AD0071 - Statement of Essential Facts**

We note the TRA's Statement of Essential Facts in respect of the above investigation.

As set out in Stemcor's previous submissions, due to the absence of domestic UK production, goods of 2500mm width and above, should be exempt from anti-dumping measures.

We welcome the TRA's conclusion that the "Initial Proposal" is not in the economic interest of the UK. We further note that the TRA has identified an "Alternative Proposal", under which anti-dumping measures would apply only to goods produced in the UK, namely, material below 2500mm in width.

Stemcor supports this Alternative Proposal. It is a significantly fairer and more proportionate approach than the Initial Proposal, which Stemcor considered unacceptable due to its impact on products not available from UK domestic production.

Yours faithfully,

Julian Verden
