EU: Definitive antidumping duty on imports of certain polyvinyl chloride from Egypt and the United States of America

Inception date: 12 July 2024 | Removal date: open ended

Anti-dumping

On 15 November 2023, the European Commission initiated an antidumping investigation on imports of certain polyvinyl chloride from Egypt and the United States of America.

Source: <https://globaltradealert.org/state-act/81855>

Notice of Conclusion of Second Sunset Review of the Anti-Dumping Duties Imposed on Dumped Imports of Polyvinyl Chloride Resin (Suspension Grade) into Pakistan Originating in and / or Exported from the People's Republic of China, Chinese Taipei, Republic of Korea and Kingdom of Thailand

Likelihood of Continuation and/or Recurrence of Dumping of PVC Resin from the Exporting Countries: Based on the sunset review, the Commission has determined that there is likelihood of recurrence and/or continuation of dumping of PVC Resin from the Exporting Countries, if anti-dumping duties imposed on dumped imports of product under review from the Exporting Countries are terminated.

Continuation of Definitive Anti-dumping Duties: In view of the determination of likelihood of continuation and/or recurrence of dumping of PVC Resin from the Exporting Countries and likely material injury to the domestic industry, there is a need to continue definitive anti-dumping duties on dumped imports of the product under review from the Exporting Countries. Thus, the Commission has decided to continue definitive anti-dumping duties on product under review from the Exporting Countries as per rates given in the following table for another period of three (03) years with effect from June 08, 2025:

Mexico Issues a Preliminary Determination in the Antidumping Duty Investigation into PVC Suspension from the United States

Published date: 24 March 2026

On March 24, 2026, Mexico's International Trade Practices Unit (UPCI) issued a [preliminary determination](#) in the antidumping (AD) investigation into PVC suspension from the United States. Learn more about the [provisional rates](#) assigned to U.S. producers/exporters.

Product Under Investigation

The product(s) subject to this investigation is vinyl chloride monomer homopolymer obtained by the suspension polymerization process, commonly known as PVC suspension, PVC suspension resin, or simply PVC. In its most basic form it is a white, odorless, water-insoluble, tasteless and non-toxic powder. PVC resin is the primary input in PVC pipe and used in various other industrial applications. The merchandise under investigation is currently classified under Mexico's tariff code 3904.10.03
