## The scope of this review

### Goods Subject to Review

This review covers certain steel products imported into the United Kingdom (UK) as detailed in [Annex 1](#).

In this document, these goods will be referred to as ‘the Goods Subject to Review’. Any reference to ‘Goods Subject to Review’ in this document refers to the product categories and commodity codes set out in Annex 1.

### Like Goods

Any reference to ‘Like Goods’ in this document refers to goods produced in the UK which are like the Goods Subject to Review in all respects, or with characteristics closely resembling them.

### Directly Competitive Goods

Directly Competitive Goods means goods produced in the UK which are directly competitive with the Goods Subject to Review.

This can include goods that are not only similar to the Goods Subject to Review, such as a different type or variety, but also include goods that occupy a position of direct competition with the Goods Subject to Review. A Directly Competitive Good may be one that is substitutable with the goods subject to review.

**Please follow the instructions for each question to provide the appropriate information regarding the Goods Subject to Review, Like Goods or Directly Competitive Goods.**

For more information about this case, you may refer to the Notice of Initiation published at: [www.trade-remedies.service.gov.uk/public/cases](http://www.trade-remedies.service.gov.uk/public/cases)

## Section A – Your organisation’s interest in the case

To register your organisation’s interest in this review, please complete the text boxes below.

Please describe your role with regards to the Like Goods, Directly Competitive Goods and/or Goods Subject to Review:

The organisation is a manufacturer based in the North West of England. Within our diverse product portfolio, we specialise in the production of ironing boards. We are the only UK manufacturer of ironing boards which are produced using one of the like goods within a dedicated manufacturing plant.

The ironing board plant directly employs around [commercially sensitive data: non-confidential range: 25-50 employees]. Beyond this core workforce, our operations have a substantial impact on the broader business ecosystem, extending to a connected supply chain network that encompasses approximately [commercially sensitive data: non-confidential range: 75-100 employees].

Ironing boards are produced using the like goods “non-alloy and other alloy cold-rolled sheet product”, identified by the specific commodity code 72269200. We purchase this material as slit coil, which is converted by the business during the production of ironing boards.

Please describe your interest in this review:

We are concerned about the disparity in tariff treatment between UK manufacturers and overseas manufacturers who use coil steel as a raw material.

Overseas manufacturers have the ability to convert coil steel, which may be subject to tariffs upon import. However, once this raw material is transformed into finished products, those products are no longer subject to the same tariffs. This differential treatment of tariffs potentially grants overseas manufacturers access to cheaper coil steel, thereby significantly impacting our ability to compete domestically.

Our primary objective in registering our interest in this review is to ensure that the potential repercussions of these tariffs are thoroughly examined.

In order to obtain a complete picture of the UK market, could you please help by providing us with details of any known UK suppliers (upstream companies providing inputs) and UK customers (downstream companies buying the Like Goods or Directly Competitive Goods). Please confirm in the final column if we are able to contact these companies.
