Please use the box below to provide information about anything else you consider relevant to this review:

- Hot rolled coil > 1830mm should NOT be included in the safeguard quotas, as there is no domestic production of these widths in HRC product category one.
- Hot rolled coil > 12.5mm thickness should NOT be included in the safeguard quotas, as there is no domestic production of these thicknesses in HRC product category one.
- Universal flats should not be included in product category one as these are NOT hot rolled coils. They are long product produced from billets.
- In lieu of TATA steel ceasing production, they will become a non-producer of HRC, and therefore there should be no safeguard quotas for category one.
- Major industries such as manufacturing of earth moving equipment, yellow goods and large structural products need support from imports, and therefore the quotas should be increased accordingly.
