TRQ review

In conducting this TRQ review, the TRA will consider whether there has been a change in circumstances since the application of the relevant tariff rate quota (see below). As part of the review, the TRA may consider:

- Whether the amount or allocation of the tariff rate quota is appropriate for domestic market conditions;
- The desirability of maintaining, as far as possible, traditional trade flows;
- Any other factors that it considers relevant.

Change in circumstances

The TRA has reviewed trade data which indicates that there may have been a change of circumstances which corresponds with the provisions in regulation 35B(9)(f) and regulation 35B(9)(g) of The Trade Remedies (Increase in Imports Causing Serious Injury to UK Producers) (EU Exit) Regulations 2019 (the Regulations). This data indicates that the import levels from certain developing countries have changed since the application of the measure. The TRA is now reviewing this data to determine whether the list of developing countries not currently excepted from the application of the tariff rate quotas should be amended.

Scope of the review

This TRQ review will consider the developing country exceptions as it applies across the following product categories:

- 1 – non-alloy and other alloy hot-rolled sheet and strip (split into categories 1A and 1B)
- 4 – metallic coated sheet
- 5 – organic coated sheet
- 6 – tin mill products
- 7 – non-alloy and other alloy quarto plates
- 12 – merchant bars and light sections (split into categories 12A (alloy merchant bars and light sections), and 12B (non-alloy merchant bars and light sections))
- 13 – rebar
- 16 – non-alloy and other alloy wire rod
- 17 – angles, shapes, and sections of iron or non-alloy steel
- 19 – railway material
- 20 – gas pipe
- 21 – hollow section

25 – large welded tube (split into categories 25A (large welded tube (1)) and 25 B (large welded tube (2))
26 – other welded tube

A full list of the commodity codes which are included in each category can be found in [Trade remedies notice 2024/06: safeguard measure: tariff-rate quota on steel goods](#).

Note that:

- Category 1 was split into Category 1A and Category 1B with effect from 1 October 2024. See: [Trade remedies notice 2024/08: safeguard measure: tariff-rate quota on steel goods](#); and
- the definitive safeguarding remedy on Category 2 was revoked by the Secretary of State with effect from 23 January 2025. See: [Trade remedies notice 2025/02: Safeguarding measure on category 2 steel products](#)

For more information about this case, you may refer to the Notice of Initiation published at: www.trade-remedies.service.gov.uk/public/cases.

Instructions

I – Who should complete this form

You should complete this form if you wish to register your interest in the TRQ review.

II – Note about confidentiality

Anyone requesting that information be treated as confidential must demonstrate to the TRA good cause as to why the TRA must treat such information as confidential, and provide a non-confidential summary of that information or a statement of reasons why it cannot be summarised.

Please ensure that each page of information you provide is clearly marked either “Confidential” or “Non-Confidential” in the header.

It is your responsibility to ensure that the non-confidential version does not contain any confidential information, which includes personal contact information, names and signatures.

All information provided to the Trade Remedies Authority (TRA) in confidence will be treated accordingly, only used for this review, and will be stored in protected systems.

The non-confidential version of your submission may be placed on the public file, which is available on www.trade-remedies.service.gov.uk/public/cases.

Section A – Your organisation’s interest in the review

To register your organisation’s interest in this TRQ review, please complete the text boxes below.

A1. Please describe your interest in this TRQ review:

elmarakbysteel is a leading Egyptian steel manufacturer with the lowest emissions in Egypt. We have a strong interest in accessing the UK market and expanding our trade partnerships.

The current TRQ system plays a crucial role in determining market access for non-UK suppliers. As a **high-quality and environmentally responsible steel producer**, we seek a review of the existing quota framework to ensure fair and non-discriminatory access for new market entrants. **elmarakbysteel has the lowest emissions intensity in Egypt**, aligning with the UK’s commitment to sustainable trade and carbon reduction goals. A more flexible and inclusive TRQ system would allow UK buyers to diversify their supply sources while supporting competitive pricing and sustainability objectives.

Through this review, we aim to highlight the importance of adjusting quota allocations to reflect market demand, encourage fair competition, and strengthen UK-Egypt trade relations for the mutual benefit of both economies.

Section B – Additional information

B1. Please use the box to provide information about anything else you consider relevant to this TRQ review:

elmarakbysteel appreciates the opportunity to provide input for this TRQ review. As a leading steel manufacturer in Egypt, we emphasize the importance of a balanced and fair TRQ system that promotes market access, competition, and trade diversification.
