Registration Form for Third Country Producers for New Investigations

Case AD0075: Boom lifts exported from the People's Republic of China

Period of Investigation (POI):	1 October 2024 – 30 September 2025
Injury period:	1 October 2021 – 30 September 2025
Deadline for response:	16 April 2026
Contact details:	AD0075@traderemedies.gov.uk
Completed on behalf of:	Oshkosh Equipment Manufacturing s. de r.l. de c.v. ("JLG Mexico")

When you have completed this form, indicate the **confidentiality status** of this document by placing an X in the relevant box below and in the header. We strongly recommend this questionnaire to be completed on the computer, so this step is easy to complete.

Confidential

Non-confidential – will be made publicly available

Please note that you will have to provide **two copies of your response** – a **confidential** and a **non-confidential version**. Both copies must be returned to the

Introduction

About us, this case, and this registration form

The Trade Remedies Authority (TRA) investigates whether trade remedies are needed to prevent injury to UK industry. The TRA has been established to provide the UK with its own independent trade remedies system.

This case is investigating the allegation that boom lifts (please refer to the section [“the scope of this investigation”](#) for more information on the goods) from the PRC are being dumped (exported to the United Kingdom (UK) at prices less than their normal value) and that this dumping is causing injury to the UK industry for these goods. This case was initiated by the TRA on 19 December 2025 following an application by a UK producer, Niftylift Limited.

For more information, please refer to the Notice of Initiation at [TRA Investigations - Trade Remedies Service - GOV.UK](#) and the application which can be found on the public file at [Boom lifts from China - Trade Remedies Service - GOV.UK](#).

Why should I take part?

You should complete this form if you are a producer based in Mexico of the like goods or other goods in the same general category as the like goods. Please refer to “The scope of this investigation” section below for more information on what constitutes the like goods.

Why you are being asked to complete this Registration Form

The TRA has received an allegation that a Particular Market Situation (PMS) may exist in the boom lifts industry in the PRC.

The TRA has yet to make a determination in relation to this allegation. However where it is determined that a PMS exists and the effect of the PMS is that sales in the domestic market of the exporting country or territory do not permit a proper comparison between the like goods destined for consumption in the exporting country or territory and the goods concerned in our investigation, we would not consider the comparable

Trade Remedies
Authority

Trade Remedies Authority

Confidential

Non-confidential

price (the price of the goods, in the ordinary course of trade, destined for consumption in the exporting country or territory) appropriate to use for the purpose of determining their normal value.

In such circumstances, the TRA may determine the normal value by determining the costs of production plus a reasonable amount for administrative, selling, and general costs and for profits. Adjustments may then be made to these figures using data from an appropriate representative third country

We have selected Mexico as an appropriate representative third country in this investigation, should it be required.

We are therefore inviting producers in Mexico to participate in the investigation and to provide certain sales and cost data which will help us:

- Understand costs, manufacturing and sales for the like goods; and,
- Compare the data against figures from the PRC.

If a large number of producers of the like goods from Mexico complete this registration form, we will use the information each one provides to help us decide which companies we want to sample for further involvement. If you are sampled, we will send you a more detailed questionnaire to complete.

Where can I find more information?

Our [Trade Remedies guidance](#) provides general information about our investigations and processes we follow.

If you have any specific questions relating to the case, now or while you're completing the questionnaire, please contact the Case Team at AD0075@traderemedies.gov.uk

You can also find out more about the regulatory basis of our investigations. The TRA investigates cases under the provisions of *Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019 as Amended by the Trade Remedies (Amendment) (EU Exit) Regulations 2019* and under the *Taxation (Cross-border Trade) Act 2018*.

A completed confidential and non-confidential version of your completed Registration Form must be submitted to the TRA by no later than 16 April 2026.

Trade Remedies
Authority

Trade Remedies Authority

Confidential

Non-confidential

If you are unable to provide a completed submission by the given deadline and you wish to request an extension, please contact AD0075@traderemedies.gov.uk and see the TRA's guidance on extension requests for further information.

Note about confidentiality

You will need to submit one confidential version and one non-confidential version of your Registration Form by the deadline.

Please ensure that each page of information you provide is clearly marked either "Confidential" or "Non-confidential" in the header.

It is your responsibility to ensure that the non-confidential version does not contain any confidential information, which includes personal contact information, names and signatures.

Please see the TRA's [public guidance](#) for further information on what can be considered confidential and how to prepare a non-confidential version of this questionnaire.

All information provided to the TRA in confidence will be treated accordingly and only used for this investigation (except in limited circumstance as permitted by regulation 46 of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019) and will be stored in protected systems.

The non-confidential version of your submission will be placed on the public file, which is available on [Boom lifts from China - Trade Remedies Service - GOV.UK](#).

The scope of this investigation

Goods Concerned

This investigation covers **boom lifts** exported from **the PRC**, described as:

Boom lifts designed for the lifting of people, equipment and/or materials, with a maximum working height of 6 metres or more, and pre-assembled or ready-to-assemble sections thereof, excluding individual components when presented separately (but not excluding the sections (presented individually or together) listed below.) The Goods Concerned may contain additional features that provide for functions beyond the primary lifting function.

The Goods Concerned may be imported as finished boom lifts, assembled or unassembled, or in the following sections presented individually or together:

- booms including articulated and telescopic or straight (with or without jibs) or sub-assemblies thereof, assembled or not;
- chassis or sub-assemblies thereof, assembled or not;
- boom turret or turntables or sub-assemblies thereof, assembled or not;
- platforms or baskets or sub-assemblies thereof, assembled or not.

The scope excludes scissor lifts, forklifts, vertical mast lifts (including where described as a 'boom' or otherwise), mobile self-propelled cranes and motor vehicles that incorporate a scissor arm assembly or boom assembly.

These boom lifts are currently classifiable within the following commodity code(s):

8427 1010 10	8427 9000 80	8428 9090 80	8431 3900 90
8427 1010 90	8428 1020 00	8431 2000 60	8427 2090 00
8427 2019 10	8428 1080 00	8431 3100 00	8427 1090 00
8427 2019 90	8428 9090 20	8431 3900 10	

These codes are only given for information.

In this questionnaire, these goods will be referred to as '**the goods concerned**'. Any reference to 'goods concerned' in this questionnaire refers to the goods description above, regardless of the commodity code under which they are exported.

Like Goods

This Registration Form will ask about your production and sales of like goods. Any reference to '**like goods**' in this questionnaire refers to goods which are like the goods concerned in all respects, or with characteristics closely resembling them.

Where this questionnaire refers to 'all goods', this means all goods that are produced by you.

For more information on this case, please see the Notice of Initiation (NoI) here: [TRA Investigations - Trade Remedies Service - GOV.UK](#)

Non-confidential

Section A – Activities of your company and any associated parties

A1 – Your company’s activities

To determine your company’s role for the purpose of this investigation, please select all of the activities of your company that apply below. For a definition of like goods please refer to above section [‘the scope of this investigation’](#).

- overseas producer of the like goods
- overseas producer of goods in the same general category of products as the like goods (e.g. other mobile access equipment or mobile elevated work platforms etc)
- other (please give details below)

If you do not produce the like goods but produce goods in the same general category of products, please describe how the goods you produce are comparable to the like goods in terms of raw materials, inputs, production, costs or any other factors:

JLG Mexico produces scissor lifts and mast lifts. Scissor lifts and mast lifts are comparable to boom lifts because they i) fall under the same HS heading as the goods concerned (see also response to question B3), ii) share the same customer base and competitive landscape, iii) use similar raw materials, and iv) have the same relevant characteristics for identifying product types (i.e. can use a PCN structure similar to that of boom lifts).

If you have selected ‘other’, please describe the role of your company with regards to the like goods:

Non-confidential

Not applicable.

A2 – Associated parties and operational links

Please give details of all associated parties involved with the company in the production and sales (export and/or domestic) of the like goods or goods in the same general category during the POI. Both natural persons (individuals) and legal persons (e.g. companies) are considered to be associated where they meet the definition of 'Related Persons' in [regulation 128 of the Customs \(Import Duty\) \(EU Exit\) Regulations 2018](#).

Examples of activities could include manufacturing, exporting, purchasing, warehousing, sales (domestic), sales (export), further processing of the like goods or comparable goods.

B3 – Commodity codes

If applicable, provide details of the commodity code(s) under which you export the like goods to the UK in the box below:

Mobile access equipment produced by JLG Mexico is imported into the UK under the commodity code [redacted – commercially sensitive information about customs heading].

B4 – Product Control Numbers

The TRA uses Product Control Numbers (PCNs) to define and distinguish the different types of products that fall under the goods description above.

PCNs, which come in the form of an **alphanumeric code**, help to create a categorisation system so that comparisons can be made between goods produced in the domestic UK market and those produced in foreign markets.

In this questionnaire and the corresponding annexes, you will be asked to construct PCNs representing the different types of products you produce. When giving your PCNs, please do not use any spaces, dashes or other means of separation, and ensure you follow the order of characteristics outlined in the table above.

When providing PCNs, please refer to Table 0 and then the relevant table for either assembled machines or the type of subassembly being represented. For example:

- For an assembled boom lift, please use the categories in Table 0 and Table 1.
- For a turret subassembly, please use the categories in Table 0 and Table 3.

This is the Product Control Number (PCN) structure:

^Cage width refers to the longest horizontal measurement of the cage assembly when the cage is parallel to the ground.

Example PCN for an electric Lithium battery powered, articulated self-drive wheeled boom lift with a 14m maximum working height and a cage width of 2m: **1D013ELA19**

Example PCN for a chassis section for a combustion powered, self-propelled wheeled boom lift with a 19m maximum working height: **2P018CO**

1. Please provide details of any manufacturing process differences which you feel may influence the PCN structure and the price comparison between the goods concerned and the like goods.

JLG Mexico does not produce the like product. However, the PCN structure provided in Table 1 would be suitable for both scissor lifts and mast lifts. Thus, if required, JLG Mexico can report the data under the same structure and indicate if something is not applicable.

Appendix reference:

2. Comment on whether the proposed PCN structure adequately aligns with your goods range. In particular we are interested in your opinions on:
 - a) the categorisation of product features;
 - b) the list of products included in the “other” category and whether this prevents a fair comparison between PCNs;
 - c) whether you produce, or are aware of, any specialised products that fall within the definition of the “goods concerned” or “like goods” which have a sufficiently different price point to make them unsuitable for comparison with the other sub-categories of the “goods concerned”; and
 - d) Is there any overlap in our PCN structure where products could be more than one PCN, if yes, can you suggest an alternative?

Please refer to the response to question B4.1.

Section D – Additional information

D1 – Other interested parties

If you believe there are other interested parties that should receive a Registration Form, please provide their organisation name, website and contact details below.

We understand the TRA has contacted all known producers of mobile access equipment in Mexico. We therefore do not have any further input.

D2 – Incentives

Please indicate if the production of the like goods or goods in the same general category benefits from any incentives provided by the Mexican government and provide details below.

There are no specific incentives for the Mobile Access Equipment industry. However, the Mexican government has general incentives in place to encourage foreign investors to establish manufacturing sites in Mexico.

D3 – Anything else

Please use the box below to provide information about anything else you consider relevant to this investigation.

Not applicable. JLG Mexico is available to answer any further questions the TRA might have.

Now you have reached the end of this Registration Form please ensure that you have prepared a confidential and non-confidential version and indicated the status of each within the header. The non-confidential version must not include personal contact information, names, signatures, and exact sales quotes. Redacted figures should be replaced with a range or index where possible. Please return both versions to the TRA using the Trade Remedies Service (trade-remedies.service.gov.uk).
