To register to this case, you need to provide two copies of your response to this form: a confidential and a non-confidential version. Your non-confidential version should be as similar as possible to your confidential version except for the redaction of the confidential information.

Both copies must be returned to the TRA by **25 March 2026** using the Trade Remedies Service ([www.trade-remedies.service.gov.uk](http://www.trade-remedies.service.gov.uk)).

The non-confidential version of your registration form and pre-sampling questionnaire may be placed on the public file: <https://www.trade-remedies.service.gov.uk/public/cases/>.

It is your responsibility to ensure that the non-confidential version does not contain any confidential information, which includes personal contact information, names and signatures. Please see the [TRA's public guidance](#)<sup>1</sup> for further information on providing confidential information and non-confidential summaries.

All information provided to the TRA in confidence will be treated as confidential in accordance with regulation 45 of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019 (the Regulations) and will not be disclosed (except in limited circumstance as permitted by regulation 46 of the Regulations) and will be stored in protected systems.

## Request to complete a detailed questionnaire

If, on the basis of the information provided in this form, we determine that you are an overseas exporter or an importer of the goods subject to the investigation, or a UK producer of goods that are like the goods subject to the investigation, or a contributor, we will ask you to complete a detailed questionnaire to inform this investigation.

If we consider it appropriate, we may only ask a sample of overseas exporters, importers and/or UK producers to complete a detailed questionnaire. By submitting this completed registration form and pre-sampling questionnaire, you agree that you may be included in any such sample.

If your company is included in the sample, you will be asked to respond to the questions in the detailed questionnaire and to support the TRA in verifying your responses. This may involve the TRA carrying out a verification visit to your premises.

If you are an overseas exporter and indicate that you do not agree to possible inclusion in a sample, your company may be deemed not to have cooperated in the investigation. The TRA will base its findings for non-cooperating parties on facts available. This may result in an outcome that is less favourable to your company than if it had cooperated.

If we decide to sample overseas exporters, and your company is not selected for this sample, you may submit a request to us to calculate individual margins for your company. We will accept your request providing that:

- you submit the required information on time; and
- the number of exporters subject to examination is not so large that complying with the request would be unduly burdensome and risk preventing the timely completion of the investigation.

### B2. Scope

29. **If you consider that the goods description for the investigation should be varied, please specify the suggested changes and provide your reasons in the field below.**

At this stage, the company does not propose a specific amendment to the product definition, but reserves the right to provide further comments if necessary.

30. **Please provide any further remarks relating to the goods concerned and the goods that are like the goods concerned (the UK like goods). Areas may include, for example: the interchangeability of different types and brands of glass containers.**

At this stage, the company has no specific comments beyond noting that the market for glass containers is segmented and that comparability may be affected by characteristics such as colour, nominal capacity, weight, design, decoration, assurance requirements and end-use. The company reserves the right to provide further comments if necessary.

### B3. Product control numbers

The TRA uses product control numbers (PCNs) to define and distinguish the different types or subcategories of goods that fall under the goods description of the goods concerned. Subcategories are developed on the basis of differences in the physical and/or commercial characteristics of the goods which may impact the price at which each subcategory is sold.

PCNs, which come in the form of an alphanumeric code, help to create a categorisation system so that comparisons can be made between goods produced in the UK and those produced in Türkiye.

We have created the following draft PCN table:

Category	Code	Description
Glass colour	P	Colourless (premium / extra white flint)
	S	Colourless (standard flint)
	C	Coloured glass
Nominal capacity	A	0-24 ml
	B	25-49 ml
	C	50-74ml
	D	75-99 ml
	E	100-199ml
Weight	A	0-24 g
	B	25-49 g
	C	50-74 g
	D	75-99 g
	E	100-149 g
Includes external (post-consumer) cullet	A	Yes, up to 24%
	B	Yes, 25-49%
Food assured	F	Yes (assured safe for use in food products)
	N	No (not food assured)
Pharmaceutical assured	P	Yes (assured for use as a pharmaceutical container)
	N	No (not assured as a pharmaceutical container)
Pressure assured	P	Yes (assured safe for pressurised goods (e.g. carbonated beverages))
	N	No (not assured safe for pressurised goods)
Volumetric assured	V	Yes (assured for use as a volumetric container)
	N	No (not assured as a volumetric container)
Container type	B	Bottle (narrower neck than body)
	J	Jar / Ramekin (wide neck)
	O	Other
Container design	S	Standard / generic / non-branded
	N	Non-standard / bespoke / complex (e.g. shaped / embossed)
Post furnace decoration	A	Painted / sprayed / printed
	B	Labelled, sleeved
	C	Other / multiple
	N	Not decorated
Supplied with lid / closure	Y	Yes
	N	No

Some examples of products and their corresponding PCNs are below:

- An amber pharmaceutical bottle with a nominal capacity of 50ml, weighing 40g, with a standard design and not provided with decoration. This good would be food assured but not volumetrically assured, and not suitable for use with pressurised products. This good was manufactured using 20% external cullet and is supplied with a lid  
= **CCBA FNNV BSNY**
- A standard flint (clear) food jar with a nominal capacity of 250ml, weighing 202g with a standard generic design and provided with an adhesive label at the factory. This good is not assured for use with foods, pharmaceuticals or pressurised goods. It is not volumetric, was not manufactured using external cullet, and is not supplied with a lid  
= **SFGN NNNN BSNN**
- An amber beer bottle with a nominal capacity of 500ml, weighing 290g, with a bespoke moulded design, volumetric assurance, usable for pressurised food but not pharmaceuticals, with a direct printed label and a single colour spray coating. This good was produced using 15% external cullet and is supplied with a lid  
= **CIHA FNPV BNCY**

**31. Please review the above draft PCN structure for this investigation and comment in the field below whether the PCN structure is adequate and appropriate to categorise the goods produced, exported and/or imported by your company.**

The company considers that the draft PCN structure may provide a useful starting point. However, the company is continuing to review whether all proposed characteristics are consistently tracked at product level and whether certain categories are sufficiently product-specific for fair comparison purposes.

**32. Please provide details of any technical or physical characteristic not included in the PCN structure that may affect the price comparison between the goods concerned and the goods that are like the goods concerned (the UK like goods).**

At this stage, the company is reviewing whether any further product characteristics, including characteristics linked to customer-specific design requirements and certain technical specifications, may materially affect price comparison. The company reserves the right to provide further comments if necessary.

**33. If you are an overseas exporter or importer of the goods concerned or a UK producer of the goods that are like the goods concerned (the UK like goods), comment on whether the proposed PCN structure adequately aligns with your goods range. In particular, we would welcome your comments on:**

- the categorisation of product features;

- the list of products included in the “other” category and whether this prevents a fair comparison between PCNs;
- whether you produce, or are aware of, any specialised products that fall within the definition of the goods concerned or the goods that are like the goods concerned (the UK like goods) which have a sufficiently different price point to make them unsuitable for comparison with the other sub-categories of the “goods concerned”; and
- do you export, produce or import any goods that could be categorised under more than one PCN? If so, please suggest any changes to the proposed PCN structure?

At this stage, the company has no final comments beyond noting that some categories, including the treatment of certain specialised or customer-specific products, may require further review to ensure fair comparison across PCNs. In addition, the company is not the exporter or the importer of the goods concerned for this investigation.

34. Please provide details of any manufacturing process differences which you think may influence the PCN structure and the price comparison between the goods concerned or the goods that are like the goods concerned (the UK like goods).

The company is reviewing whether manufacturing process differences associated with customer-specific design complexity, assurance requirements and certain post-furnace operations may influence comparability and reserves the right to provide further comments if necessary.

## B4. Comments on subsidies

35. If you have any information about any alleged subsidies in Türkiye that are affecting the production or sales of the goods concerned, please provide details in the box below.

At this stage, the company is reviewing the alleged subsidy categories identified in the Registration Form and the Notice of Initiation. The company notes that the allegations appear broad and may include measures that are not used by the company, are not specific to the company, and/or are not relevant to the goods concerned. The company will provide any relevant company-specific information in any subsequent detailed questionnaire, if requested.

Consider redacting this information in your non-confidential version of this form, in accordance with our [guidance](#).

36. Is any of the research and development conducted in relation to the goods your company manufactures performed by other companies within the same corporate group? If so, please provide details.

[Redacted – Commercially Sensitive Information].

Consider redacting this information in your non-confidential version of this form, in accordance with our [guidance](#).

37. Please describe the process by which your company secures land for use in the manufacturing and sale of the goods concerned. If so, please provide details.
